## Baculovirus and Insect Cell Expression Protocols (Methods in Molecular Biology)

Baculovirus Expression Protocols, Second Edition, provides the detailed steps required to perform the techniques involved with the use of baculoviruses and insect cell culture and discusses problems that may be encountered. This newly-revised and updated edition provides a cutting edge step-by-step guide for biochemists, molecular biologists, biochemical engineers and others using the BEVS and/or insect cells for producing recombinant proteins. Furthermore, Baculovirus Expression Protocols, Second Edition, provides assistance to scientists and engineers interested in developing and producing baculovirus insecticides. Authors list all available insect cell lines and provide methods for isolating new cell lines. The procedures involved in producing products, both at laboratory scale and large scale, are discussed, as well as the production in insect larvae. It is hoped that this volume will not only aid the user in successfully completing the tasks described herein, but will also stimulate the development of improved techniques and new applications of baculoviruses and insect cell culture. Timely and thorough, this volume will become an essential reference for anyone using baculoviruses and insect cell culture.
