Robert Humphrey

Stream of consciousness in the modern novel Robert Humphrey

[From the back cover] "Robert Humphrey seeks to provide a precise understanding of stream of consciousness in literature--its purpose, its techniques, and its significance. Through an examination of the work of James Joyce, Virginia Woolf, Dorothy Richardson, William Faulkner, and other contemporaries, he points to the various means novelists have used to express the inchoate psychic life of their characters. He discusses at length the purpose and usefulness of free association--the chief device for depicting and controlling both the movement and the privacy of consciousness. His treatment of what he terms "cinematic devices," such as montage, flash-back, fade-out, is particularly illuminating. In his discussion of forms Mr. Humphrey analyzes the various structural patterns that stream-of-consciousness writers have used in lieu of conventional plots and shows how they have managed the unities of space and time. This book make challenging reading for the serious student of literature, and should prove especially useful to writers."
