Temple of Heaven and Earth is the focus of a study of earth and cosmic energy. Energy affects everything from the physics of the universe down to the miracle of life on Earth. Modern corporate-science uses energy to power mechanisms. Ancient science used energy to heal, cure, and support health, but more especially to promote inspiration, truth in speech, communication, knowledge, and the gift of the 'joy of life.' Both ancient and modern science, traditions, and testimony are woven together to give the reader an opportunity to come to their own conclusions. Much of the confusion rests in the multiplicity and duplication of different names and concepts for the same thing. Astronomical phenomena transfers, modulates, and stores energy according to random and chaotic movement, as well as orderly cyclical progressions which can be cataloged by geometry, numbers, and proportions. Therefore, ancient people accepted a universe that is half chaos and half order which resulted in the perpetual creation of change, motion, and especially energy. This cosmic energy was captured by the Earth to fuel earth-energy sites that promoted health and inspiration to mankind.
