Complexity Perspectives in Innovation and Social Change (Methodos Series)

Complexity Perspectives in Innovation and Social Change (Methodos Series)

Innovation is nowadays a question of life and death for many of the economies of the western world. Yet, due to our generally reductionist scientific paradigm, invention and innovation are rarely studied scientifically. Most work prefers to study its context and its consequences. As a result, we are as a society, lacking the scientific tools to understand, improve or otherwise impact on the processes of invention and innovation. This book delves deeply into that topic, taking the position that the complex systems approach, with its emphasis on 'emergence', is better suited than our traditional approach to the phenomenon. In a collection of very coherent papers, which are the result of an EU-funded four year international research team's effort, it addresses various aspect of the topic from different disciplinary angles. One of the main emphases is the need, in the social sciences, to move away from neo-darwinist 'population thinking' to 'organization thinking' if we want to understand social evolution. Another main emphasis is on developing a generative approach to invention and innovation, looking in detail at the contexts within which invention and innovation occur, and how these contexts impact on the chances for success or failure. Throughout, the book is infused with interesting new insights, but also presents several well-elaborated case studies that connect the ideas with a substantive body of 'real world' information.

You are so out of date, spending your spare time by reading in this new era is common not a geek activity. So what these textbooks have than the others?

Vincent Mickens:

As a student exactly feel bored for you to reading. If their teacher requested them to go to the library or make summary for some reserve, they are complained. Just small students that has reading's spirit or real their interest. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Complexity Perspectives in Innovation and Social Change (Methodos

Series) can make you really feel more interested to read.
