Conscious Evolution: The Dance of Intuition and Intellect. Sheldon Stoff, Barbara Smith Stoff

With deep reading in myth and literature, one's cognition becomes as a rich mother loam wherein spirit can dwell and build that interior castle, from which the indwelling spirit begins to speak through the imagination, the body, and the intellect of the individual. Over time, body, mind, and spirit become one. Then this 'one' can and often does experience the merging within the One.

Through the merging of intuition and intellect, we will comprehend the acceleration of consciousness that is overtaking us. Functioning within a state of universal awareness of our oneness will, in the long run, prove to be much easier than defining ourselves into small groupings of discordant persons and nations. The education and evolution of vibrant communities is our beginning task. The creation of a world with a universal consciousness of oneness is our ultimate realization.

To act in accord, to make a bridge to new ways of thinking, and in the belief that the reported experiences of individual journeys in our studies, and in our consciousness, can be of great significance now-at this point in time with the world in a general state of confrontation and conflict-we offer this report from our own research and from within this frame of reflection.
