Fantasy, in FANTASY OR REALITY, often refers to incredible outcomes accompanied by life-threatening dangers involved in the continuing evolution of cyberspace. At the same time, the focus is the current economic space transformed into a time continuum on topics that shift from automated wheelchairs to mammoth-size transnational firms.

Reality, in this context, identifies facts extending from the numbers of children living in poverty, to the changing offerings of public libraries, to the astonishingly large values involved in world finance and trade. The goals of power and wealth frequently appear to be the guiding force in many of the more than fifty topics introduced in this work. In some cases, individuals, firms, and national or international institutions have redefined terms such as efficiency, growth, and size to suit their respective purposes.

FANTASY OR REALITY is a notebook presentation that seeks to encourage rethinking toward the two economic goals that got us here in the first place: freedom and profits.
