NMR Spectroscopy in Pharmaceutical Analysis

NMR Spectroscopy in Pharmaceutical Analysis

For almost a decade, quantitative NMR spectroscopy (qNMR) has been established as valuable tool in drug analysis. In all disciplines, i. e. drug identification, impurity profiling and assay, qNMR can be utilized. Separation techniques such as high performance liquid chromatography, gas chromatography, super fluid chromatography and capillary electrophoresis techniques, govern the purity evaluation of drugs. However, these techniques are not always able to solve the analytical problems often resulting in insufficient methods. Nevertheless such methods find their way into international pharmacopoeias. Thus, the aim of the book is to describe the possibilities of qNMR in pharmaceutical analysis.

Beside the introduction to the physical fundamentals and techniques the principles of the application in drug analysis are described: quality evaluation of drugs, polymer characterization, natural products and corresponding reference compounds, metabolism, and solid phase NMR spectroscopy for the characterization drug substances, e.g. the water content, polymorphism, and drug formulations, e.g. tablets, powders. This part is accompanied by more special chapters dealing with representative examples. They give more detailed information by means of concrete examples.

- combines theory, techniques, and concrete applications-all of which closely resemble the laboratory experience
- considers international pharmacopoeias, addressing the concern for licensing
- features the work of academics and researchers, appealing to a broad readership

From reader reviews:

Michael Pauls:

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite e-book and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the guide entitled NMR Spectroscopy in Pharmaceutical Analysis. Try to face the book NMR Spectroscopy in Pharmaceutical Analysis as your close friend. It means that it can to become your friend when you truly feel alone and beside regarding course make you smarter than ever before. Yeah, it is very fortuned in your case. The book makes you considerably more confidence because you can know anything by the book. So , let me make new experience along with knowledge with this book.

Ryan Young:

As people who live in typically the modest era should be up-date about what going on or information even knowledge to make all of them keep up with the era which is always change and make progress. Some of you maybe may update themselves by examining books. It is a good choice for you personally but the problems coming to a person is you don't know which one you should start with. This NMR Spectroscopy in Pharmaceutical Analysis is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

Emily Scott:

Information is provisions for folks to get better life, information these days can get by anyone on everywhere. The information can be a understanding or any news even an issue. What people must be consider any time those information which is from the former life are challenging be find than now could be taking seriously which one works to believe or which one typically the resource are convinced. If you obtain the unstable resource then you buy it as your main information you will have huge disadvantage for you. All of those possibilities will not happen with you if you take NMR Spectroscopy in Pharmaceutical Analysis as your daily resource information.

Yong Dickerson:

Your reading 6th sense will not betray you, why because this NMR Spectroscopy in Pharmaceutical Analysis guide written by well-known writer who knows well how to make book which can be understand by anyone who all read the book. Written within good manner for you, still dripping wet every ideas and writing skill only for eliminate your current hunger then you still uncertainty NMR Spectroscopy in Pharmaceutical Analysis as good book but not only by the cover but also with the content. This is one publication that can break don't determine book by its protect, so do you still needing an additional sixth sense to pick that!? Oh come on your examining sixth sense already alerted you so why you have to listening to an additional sixth sense.
