En cualquier ambiente interior es necesario mantener el aire limpio, sin olores y en unas adecuadas condiciones de temperatura, humedad y velocidad. Es especialmente importante el control de aquellas situaciones en las que se generan atmósferas tóxicas e inflamables, por el daño que pueden producir a las personas expuestas y a las propias instalaciones. La ventilación tiene por objeto el control de las mencionadas situaciones ambientales. Esta libro guiará a los alumnos de las escuelas de Ingeniería Naval en sus primeros pasos en el diseño de conductos.
