Routledge Handbook of Forest Ecology (Routledge Handbooks)

Routledge Handbook of Forest Ecology (Routledge Handbooks)

This comprehensive handbook provides a unique resource covering all aspects of forest ecology from a global perspective. It covers both natural and managed forests, from boreal, temperate, sub-tropical and tropical regions of the world. The book is divided into seven parts, addressing the following themes:

- forest types
- forest dynamics
- forest flora and fauna
- energy and nutrients
- forest conservation and management
- forests and climate change
- human impacts on forest ecology.

While each chapter can stand alone as a suitable resource for a lecture or seminar, the complete book provides an essential reference text for a wide range of students of ecology, environmental science, forestry, geography and natural resource management. Contributors include leading authorities from all parts of the world.
